

USED MODEL ERGOSONIC AUTOMATIC STENCIL CLEANER

Smart Sonic ErgoSonic Stencil Cleaner:

The **ErgoSonic** is the first ergonomically designed ultrasonic stencil cleaner that is front-loading at a comfortable height for all users. This model is fully automatic and allows for unattended operation. There is a sealed process chamber so there are no odors or contact with cleaning solutions. There are also ***no moving external parts***. The stencil remains stationary while the wash and rinse solutions move in and out of the process chamber. The SR (separate rinse) provides a separate water rinse for use with 440-R-SMT Detergent and other chemistries requiring a water rinse. The **ErgoSonic** is capable of cleaning stencils up to 29" (750 mm). The process chamber is large enough to clean heat exchangers and oven radiators.

The **ErgoSonic** is recommended for applications requiring high quality, full automation, EPA compliance and cleaning *less* than 20 stencils per day.

Serial Number SSC-0804-1364 – Includes the following options:

- Auto-fill
- Chem Pump
- Heater
- Filtered wash drain
- 208V; 3 phase; 20 amps

As Is: \$30,809

Refurbished: \$50,089
